CLIMATE-INFORMED HABITAT CONSERVATION PLANS

Examples, tools, and step-by-step materials

Join climate adaptation researcher and consultant Jennie Hoffman and Region 8 HCP Coordinator Dan Cox for practical, how-to tips on integrating climate change considerations into habitat conservation planning. Learn more about materials recently developed for the Service, including a framework for potential opportunities and recommendations for integrating climate smart principals into HCPs and a “quick guide” for determining how deep to go for a particular project. Dan and Jennie will walk through how these materials were developed and key questions to ask at each stage of developing an HCP.

Guest Speaker:
Jennie Hoffman

**How does climate
change come into
play in developing
HCPs?**
